Northeastern University (Boston, MA) | *May 2019*
B.S Bioengineering (conc. Medical Devices)**,** *Dean's List, Society of Women Engineers*

EXPERIENCE

Donaldson Filtration GB (Poole, UK) | *May 2022 - January 2024*
Product Manager
- Architected and launched a $1.3M end-to-end B2B product pipeline from initial ideation to final delivery, targeted at high-growth additive manufacturing sectors and driving 26% portfolio growth.
- Secured executive approval for a multi-year product roadmap, translating market analysis and customer needs into prioritized feature releases across the portfolio.
- Owned full product definition and feature scoping, distilling complex customer feedback into essential product requirements to eliminate feature bloat and slash manufacturing costs by 35%.
- Unified cross-functional engineering (R&D), third-party regulatory testing agencies, and executive stakeholders to resolve critical-path alignment issues and safeguard $8M in US revenue.
- Designed and executed behavioral blind product testing with sales and product teams, translating unbiased customer feedback into product-market fit validation and go-to-market decisions.
- Led technical product presentations for key stakeholders, translating product roadmaps, engineering tradeoffs, and technical specifications into clear recommendations that drove alignment on development priorities.

WaterScience - Aquagenics R&D India (Bangalore, India) | *April 2021 - March 2022*
Marketing Manager
- Owned full-funnel discovery and lifecycle optimization across 15 marketing campaigns, analyzing web analytics data to scale conversion rates by 20% and double ROAS.
- Built data-backed business cases to validate new feature opportunities and priority customer segments, securing CEO and CMO alignment and expanded investment.
- Partnered with external engineering and creative agencies to accelerate digital product development and improve adoption across e-commerce and marketplace channels.

Excelligence Learning Corporation (Monterey, CA) | *October 2019 - May 2020*
Associate Product Developer
- Spearheaded end-to-end development from concept creation to commercial launch for a new 40+ SKU children's product line, pitching the initial business case to the Head of Product to secure funding.
- Translated initial product concepts into concrete manufacturing requirements, delivering all 40+ products on time while strictly meeting cost, safety, QA, and ASTM F963 regulatory criteria.
- Managed the end-to-end vendor lifecycle, collaborating daily with manufacturing partners in China to manage technical product specifications and protect target gross margins.

TECHNICAL SKILLS

- **Technical & Data:** Python (Pandas, NumPy), MATLAB, Arduino (C++), Power BI, Tableau, Excel, Google Sheets
- **Product Management & Discovery:** Product Strategy, PRDs, Roadmapping, Feature Scoping & Prioritization, User Research, Journey Mapping, Behavioral Testing, Product Validation, Competitive Analysis
- **AI Tools:** Claude Code, ChatGPT/Codex, NotebookLM, Jira, Lovable, Gemini, Perplexity
